

Check out this document. It has some skew to it.

Section A

This is a sample document with two sample columns of text data

Section B
The text data is rotated at an angle. This can cause issues in the OCR processing pipeline.

Grouped Section Below Here

This section is a single column at the end of the document. Below is some sample financial performance.

Q1	Q2	Q3	Q4
\$21.41	\$32.32	\$82.32	\$821.51
\$21.48	\$29.43	\$74.21	\$621.35
